

KOPPULA SANDEEP

Associate Software Engineer | Full-Stack & Cloud Developer | Computer Science Graduate

Hyderabad, Telangana • +91 7075887644 • sandeepkoppula18@gmail.com

Portfolio: koppulasandeep18.github.io/portfolio • LinkedIn: linkedin.com/in/sandeepkoppula • GitHub: github.com/Koppulasandeep18

PROFESSIONAL SUMMARY

Analytical and results-oriented Computer Science Engineer with strong competencies in full-stack web engineering (MERN Stack), core programming (Python, Java), and scalable cloud architectures (AWS). Demonstrated ability to design, build, and deploy production-grade software solutions—ranging from enterprise CRM platforms with live cloud deployments to high-accuracy computer vision pipelines. Adept at rapid problem resolution, system diagnosis, and agile collaboration. Ready to contribute high-impact code as an Associate Software Engineer / Graduate Developer.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Languages & Paradigms:** Python, Java (OOP), JavaScript (ES6+), SQL (PostgreSQL/MySQL), HTML5/CSS3
- **Full-Stack & Web:** React.js, Node.js, Express.js, MongoDB, RESTful APIs, JWT Authentication, JSON, CRUD
- **Data & Intelligent Systems:** OpenCV, CNN, NumPy, Pandas, Exploratory Data Analysis (EDA), Image Classification
- **Cloud, DevOps & Tools:** AWS (EC2, S3, Cloud Workflows), Git, GitHub, Postman, Jupyter Notebook, VS Code, Linux/Bash
- **CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Design, Database Management (DBMS), System Debugging

PROFESSIONAL EXPERIENCE

SMTI Exotic Fab Pvt. Ltd. | IT Support Engineer

2026 – Present

- Manage end-to-end technical support and infrastructure maintenance across 50+ network endpoints, hardware nodes, and software systems, maintaining 99.5% operational uptime.
- Perform root-cause diagnostics on complex system faults, network latency issues, and OS errors, reducing average issue resolution turnaround by 30%.
- Enforce rigorous cybersecurity hygiene, access provisioning, automated workstation backups, and routine configuration patches to secure business operations.

AWS Cloud | AI/ML Cloud Virtual Intern

Jan 2024 – Mar 2024

- Architected end-to-end machine learning pipelines on AWS cloud development environments, covering automated data ingestion, cleaning, and feature engineering.
- Trained, benchmarked, and evaluated predictive models using industry-standard metrics (Precision, Recall, F1-Score, RMSE), optimizing model accuracy.
- Strengthened cloud deployment practices by containerizing model workflows and exploring serverless inference architectures on AWS.

FEATURED ENGINEERING PROJECTS

Aqua Drop CRM [MERN Stack, REST APIs, JWT, MongoDB] | Live: lime.vercel.app/login

2025 – 2026

- Designed and implemented a scalable, full-stack Customer Relationship Management (CRM) system orchestrating multi-tier lead pipelines, customer lifecycle, and order processing.
- Engineered robust security with JSON Web Tokens (JWT), Bcrypt password hashing, and Role-Based Access Control (RBAC), securing sensitive client data across admin and agent roles.
- Built dynamic data visualization analytics with React.js and high-efficiency MongoDB aggregation pipelines, delivering real-time business KPIs and tracking metrics.

Real-Time Facial Emotion Detection Pipeline [Python, OpenCV, CNN, Deep Learning]

2024

- Developed a high-performance computer vision application utilizing Haar Cascade classifiers for rapid face localization and a Convolutional Neural Network (CNN) for classification.
- Trained the deep learning architecture on facial emotion datasets to accurately classify 4 distinct emotional expressions (Happy, Sad, Angry, Neutral) with high confidence.
- Optimized frame-by-frame inference pipeline to process live camera video feeds at 30+ frames per second with minimal compute latency.

Smart Travel Itinerary & Recommendation Engine [React.js, Node.js, Express, MongoDB]

2024

- Created an intelligent travel curation web platform that dynamically recommends customized travel itineraries filtered by budget constraints, destination preferences, and travel activity.
- Architected modular RESTful backend services with MongoDB schema validation to guarantee seamless CRUD operations and sub-second query latency.

EDUCATION

Prasad V. Potluri Siddhartha Institute of Technology, Vijayawada — B.Tech in CSE (CGPA: 7.45)

2023 – 2026

AANM & VVRSR Polytechnic, Gudlavalleru — Diploma in CSE (Score: 66%)

2020 – 2023

Z.P.H.S, Chirukurota — Secondary School Certificate (SSC) (Score: 97.67%)

2019 – 2020

CERTIFICATIONS & KEY HIGHLIGHTS

- Agentforce Specialist Certification — Salesforce
- BDL Trainee Recruitment Interview Shortlist — Bharat Dynamics Ltd (2025)
- Palo Alto Cybersecurity Virtual Internship — Palo Alto Networks
- Salesforce Agentblazer Champion Program — Salesforce (2025)
- Programming in Java (NPTEL) — IIT / SWAYAM Certified
- AI-ML Cloud Virtual Internship — AWS Cloud
